Our Portfolios Mid Term Presentation

Zainab Ridha & Katia henriquez

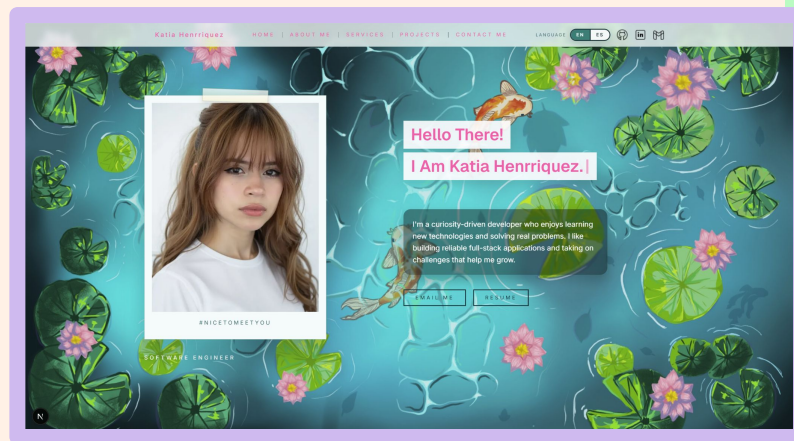

Introduction

Zainab Ridha

△ // } 00

Designed to clearly showcase projects with media and links while maintaining a clean, responsive, and easy-to-navigate user experience

Katia Henriquez

Focus: Independent Software Developer

Technical Build

□ △ // } 00

Portfolio Structure

Single-page layout with Home, About, Services, Projects, and Contact.

Technologies Used

Next.js, React, TypeScript, Tailwind CSS, reusable components.

Project Showcase

Projects with media and professional links (GitHub, LinkedIn, Email).

Key Implementation Details

Component based design

- Each section is its own component
- This keeps code organized and reusable

Interactive UI

- Loading screen and animations improve the user experience
 - Smooth scrolling navigation between sections
- Responsive layout adapts to mobile tablet and desktop screens

Dynamic rendering

- Media content and links are displayed dynamically

Concepts from Class

- Navigation section headings, buttons, and links used to organize content
- Tailwind CSS used for styling and layout utilities
- Adjust layout across screen sizes
- Reusable styles keep the design consistent
- React state controls UI elements such as modals and project cards
- Event handling for navigation buttons and interactions

Zainab's Future Improvements

01

Contact Form

Add a contact form and connect it to SQL Database

02

Admin dashboard

Allow authenticated user to view submitted messages

03

Authentication

Login system using password hashing and session cookies for Admin

Contact Form Feature

- Users will submit:
 - Name, Email, Message, Phone #
- User submits contact form
- JavaScript sends POST request using fetch
- Backend API receives the request
- Backend validates input
- Data is stored in a SQL table
- User action → fetch request → backend route → SQL query → response.

Katia's Portfolio

Katia's Future Improvements

01

Bilingual Support

Add English and Spanish (EN/ES) language support

02

UI Animations

Enhance the interface with animations so components feel more interactive.

03

Scroll-Based Effects

Implement scroll-aware animations using IntersectionObserver

04

Project Expansion

Redesign the Projects section add skills section and add more projects, descriptions, and demo videos.

05

Backend & Contact

Integrate Supabase and connect the contact form with API calls and feedback states.
